***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/1/2005 and 1/3/2006 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 10-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10, the terms "said catch" and "said latch" lack antecedent basis.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-14, and 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 3,856,147 to Piretti.

Piretti discloses a snap together connection system comprising all the elements recited in the above listed claims including, such as shown in Fig 4, a plurality of panels 1, a plurality of corner covers/connectors each having an elongated catch with flexible slot walls 3 having a length and being substantially rigid and having adequate memory and elasticity to deform and snap back, a latch with an enlarged head 6 having a length substantially similar as the length of the slot walls, a straight connector (defined as the portions between the two ends) with at least one latch and catch, at least one alignment stop 8 to limit sliding movement of a snapped together latch and catch, wherein the elongated catch and latch extend at a fixed angle relative to each other; through which the first corner cover and the second corner cover are connected together by snapping the elongated latch of either the first corner cover or the second corner cover into the elongated catch of the other cover corner.

#### ***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Response to Amendment***

7. In the Amendment filed on 12/1/2005, applicant stated that claims 15-16 are withdrawn; however, the examiner considered that applicant's intent is to cancel claims 15-16. Clarification or correction is required. Should applicant's intent is to cancel the claims, then they need to be specifically stated as such.
